#### Disclaimer

Measures shown with an asterisk (\*) have been converted as per your preference. These are not the official measures. To view the measures specified by the manufacturer, [click here](#).

### APPLICATION

For maximum loading capacity, hooks should be mounted directly to wall studs, generally found at 16" intervals. If hooks are not mounted to studs, use appropriate drywall anchors (not included with hooks). Hooks come with plastic anchors that may not adhere to all types of walls. The installer is responsible for ensuring that appropriate anchors are used.
