

Series 9997SC Single Extension Ball Bearing Slide with Soft-Close Mechanism - 35 kg Capacity

Product # 9997SCX22B

Length 22 in

DESCRIPTION

This soft gliding slide can be used on a variety of applications from kitchen cabinets to dresser drawers.

ADVANTAGES AND BENEFITS

The soft-close mechanism ensures the automatic closing of the drawer. Its durable mechanism is designed to slow the drawer to a close to prevent slamming. It then pulls the drawer to its final closed position.

APPLICATION

To mount into a frameless cabinet: Separate slide members by depressing the lever release. Install large cabinet members. Check that both cabinet members are vertically and horizontally parallel. Make necessary adjustments. Install drawer member through vertical slots. Adjust position and install two more screws in round holes. Insert drawer part and close completely. Download instructions for illustrations.

INCLUDED PRODUCT(S)

Mounting hardware included.

IMPORTANT INFORMATION

Do not exceed safe working load.
